**Pre-Anesthesia Blood Screen Consent Form**

**Date:** \_\_\_\_\_

**Client:** \_\_\_\_\_

**Patient:** \_\_\_\_\_

Your pet is in for anesthesia and/or surgery. We will perform a physical examination on your pet before administering anesthesia. However, we **highly recommend** a pre-op blood profile to be performed for the purpose of insuring your pet to be in a low risk category during anesthesia. By performing this important pre-op blood profile, we will be able to rule out any pre-existing internal problems they may not be evident physically, but could lead to serious complications. This blood profile consists of a few selected tests that check for conditions such as anemia, infection, diabetes, kidney or liver failure, and other potential underlying problems. There is an additional **\$53.40 fee** for these important procedures. **Please indicate your choice by signing on the line below the appropriate response.**

Please **complete** the blood work you recommended prior to anesthesia on my pet. If no abnormalities are found, I request that you continue with the anesthesia and/or surgery.

I have decided to **decline** the recommended pre-op bloodwork at this time and request that you continue with the anesthesia and/or surgery.
